V. Any additional notes on perceived causes of discrepancies:

-The total number of ballots counted for audit versus election night could be accounted for due to ballots jamming because of length and folds of AV & EV ballots, Two ballots could have been jammed in the tabulator and "not read" but jam cleared may not have been re-inserted/re-fed through the tabulator.

-Over-votes are recorded as blanks.

-A hand counted ballot on election night may have been identified one way by workers election night versus workers doing the audit

-Election night tallies did not record the two ballots unknown how votes were cast.
